

Asutosh Mohapatra

A self-critique, who likes to take time to learn on the go, review and enhance his work, keep things simple. I expect my upcoming role gives me ample scope of learning, keeps me on my toes and lets me add value to people's lives and of-course to the business.

CERTIFICATES

Neural Networks And Deep Learning specialization (by Deeplearning.ai) [↗](#)

Algorithmic Toolbox [↗](#)

Fundamentals of Digital Image and Video Processing [↗](#)

PERSONAL PROJECTS

Hostel Room Allotment System [↗](#)

▣ I created a hostel room counseling system designed to book rooms for my college students. I have used the priority queue and trie data structures. This is a well-structured project. It is very time and storage efficient.

Sentiment Analysis Of Tweets Using LSTMs [↗](#)

▣ Using LSTMs I have created a tweet classifier that classified if a tweet is racist or not. I got a very good accuracy score of 95%.

Bitcoin Stock Prediction System Using LSTMs [↗](#)

▣ I have created an LSTM neural network model to help people in getting profit in future if they invest in bitcoin .

News Aggregation and Fraud News Detection using Deep Learning

▣ Hybrid LSTM based deeplearning model to detect fraudulent news and divide news articles according to the genres.

KNOWN CONCEPTS

Data Structures and Algorithms

Deep Learning (Tensorflow, Keras)
